```
Java
class Solution {
    public int countPaths(int[][] grid) {
    }
}
JavaScript
/**
 * @param {number[][]} grid
 * @return {number}
var countPaths = function(grid) {
};
C++
class Solution {
public:
    int countPaths(vector<vector<int>>& grid) {
    }
};
C#
public class Solution {
    public int CountPaths(int[][] grid) {
```

}

}
